

# EUMETSAT Ocean Training Activities

Hayley Evers-King

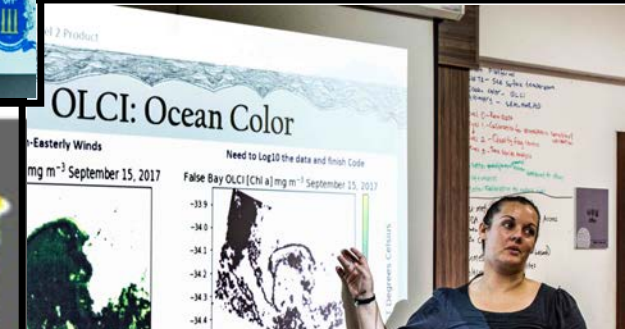

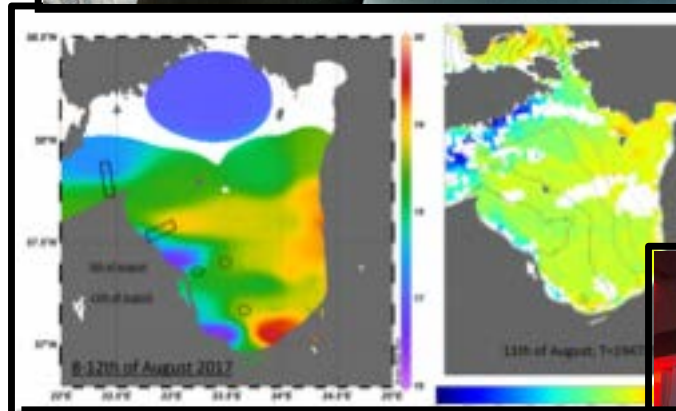

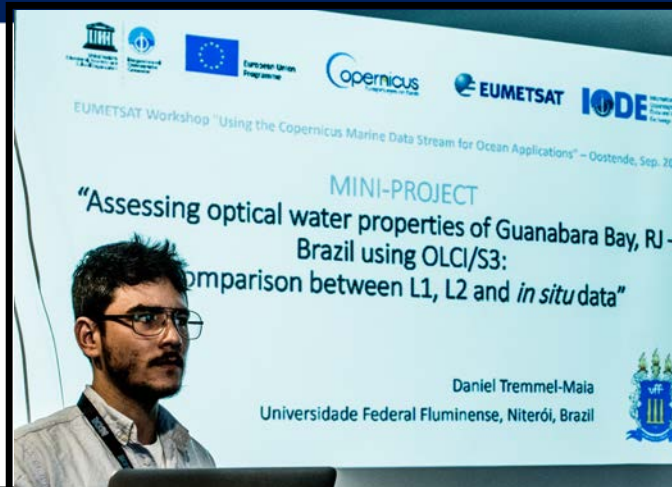

Christine Träger-Chatterjee

7 June 2018

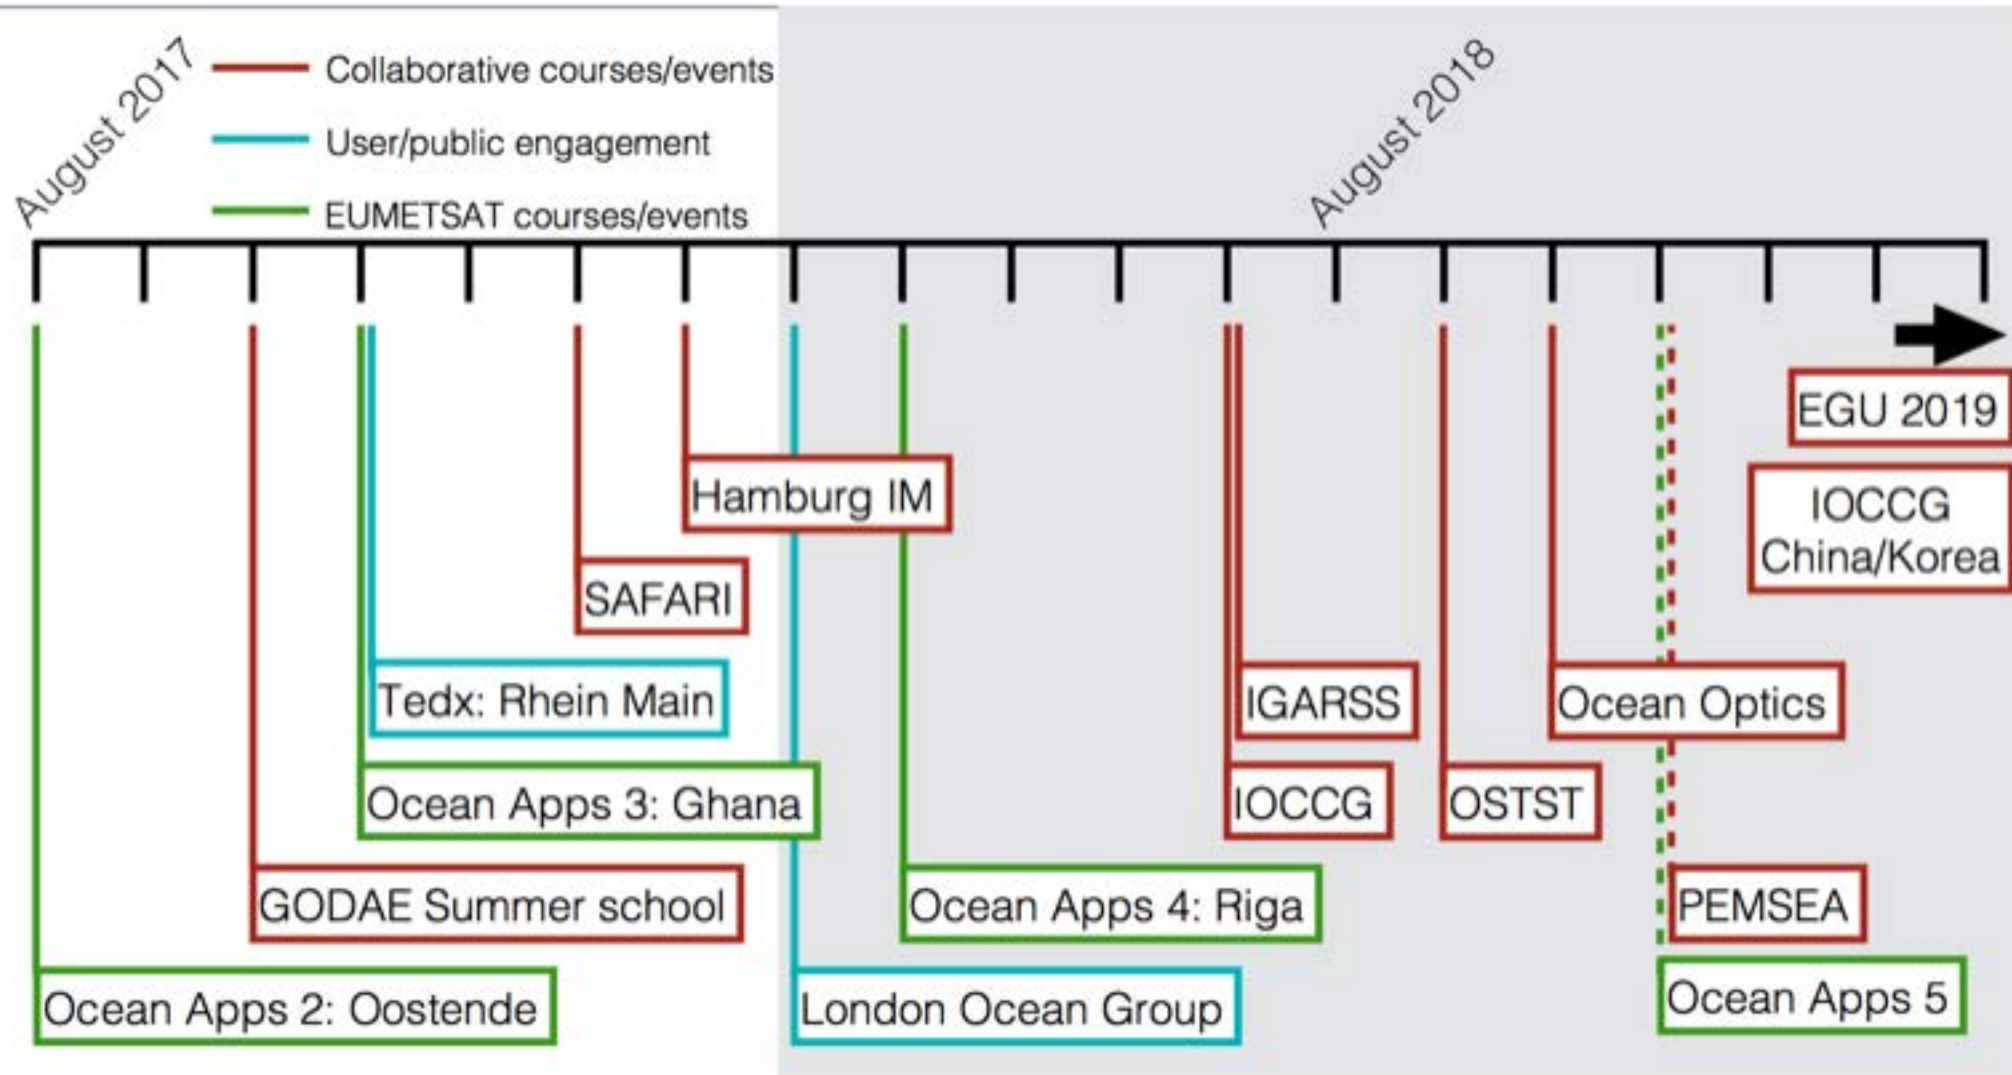

# Copernicus Marine Training

- Ocean training events including:
  - 2 week courses (one week online, one week in class)
  - Unstructured, participant-led learning approaches.
  - Collaborative training events at conferences
  - New types of activity: youtube, MOOCs, Hackathons, TEDx. code repositories (jupyter, SNAP).
  - Copernicus Collaborative Expert Exchange.

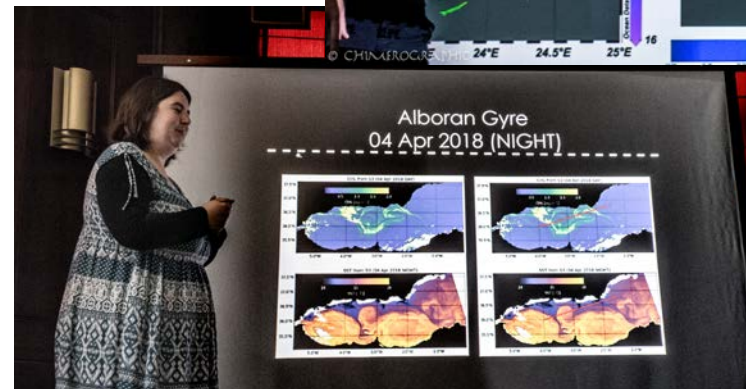

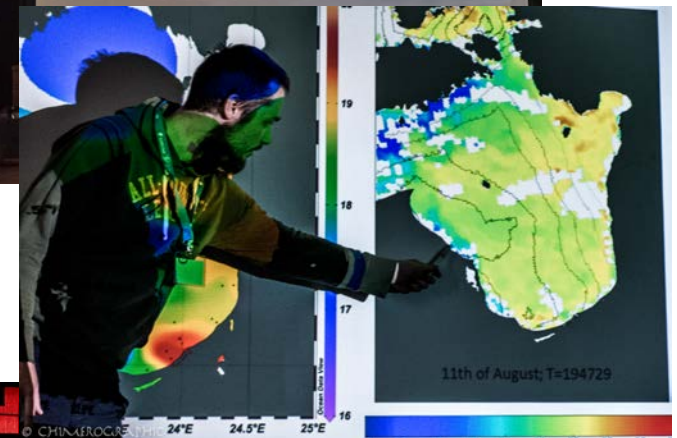

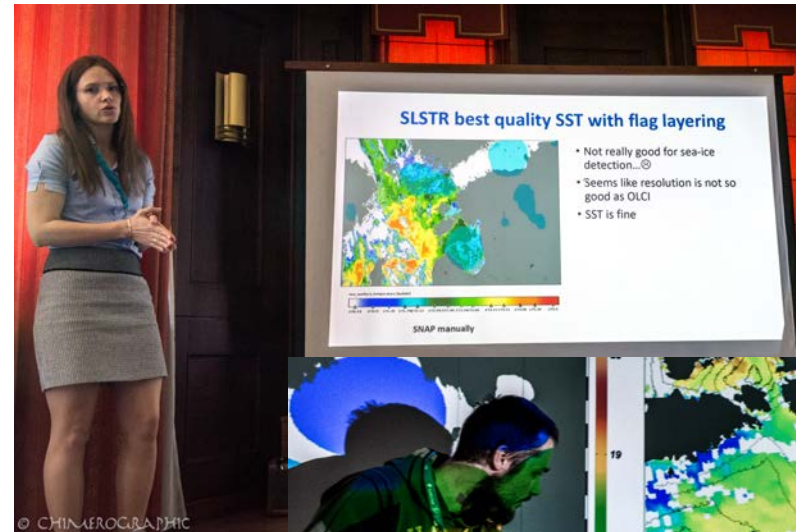

# Events Schedule

# How can we support the GHRSSST community?

- Are there key events that would benefit from training support?
- Specific training needs with regards to certain tools (e.g. python, DIAS).
- Common concepts that new users find challenging (to form tutorials)?
- Resources that would help with your own training (e.g. University courses etc).
- Available training material from GHRSSST?

Suggestions, Comments, Questions  
are most welcome!
