GHRSSST User Matrix

Since June 2019, FTP to HTTPS (Drive) switch has made significant impact to data usage. User Access (a) tracking has been more refined, but the downloaded data Volume (b) and Files (c) have increased dramatically, indicating getting data more efficiently

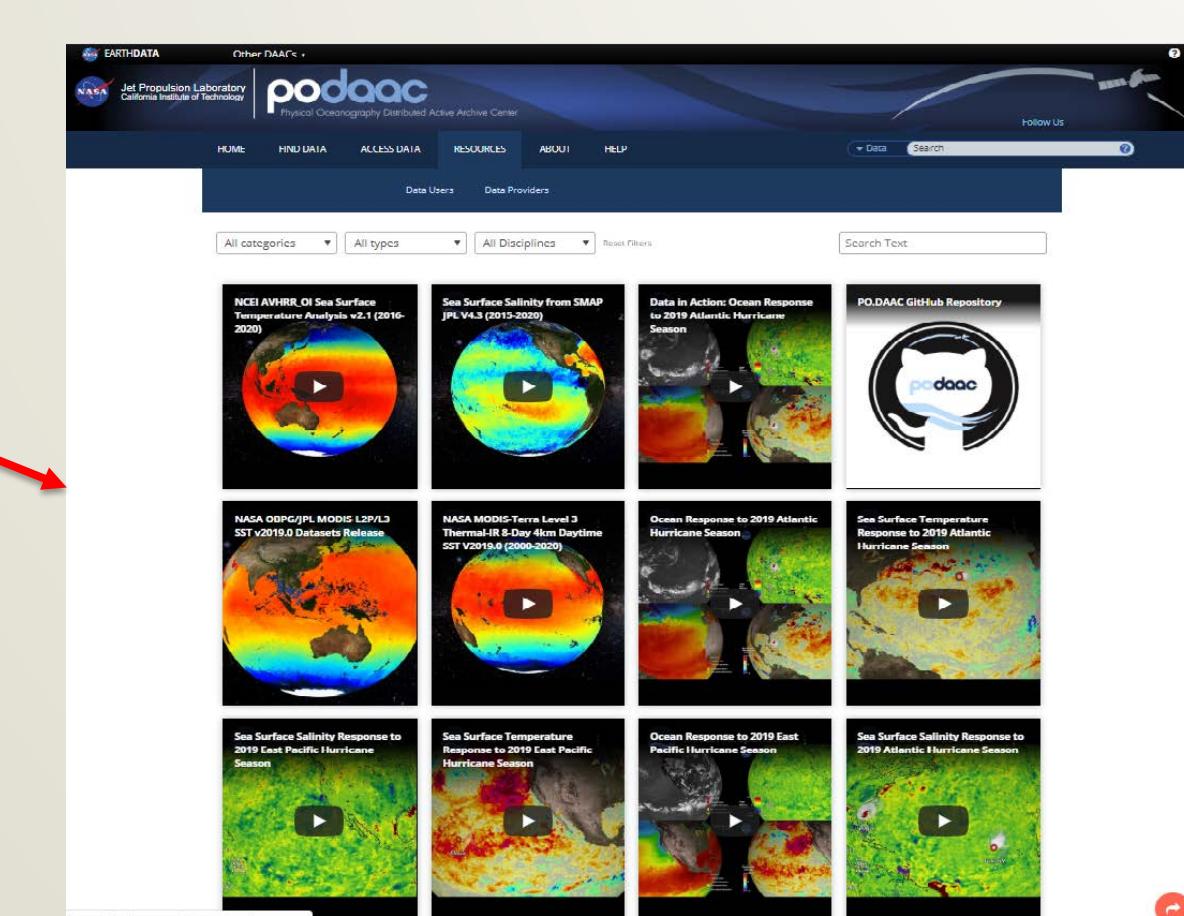

PO.DAAC Web Portal Revitalization

- Web Portal Revitalization with Simplified, modernized design and content center User Experience

- Find Data** provides Quick and easy Data discovery, Organized by science discipline

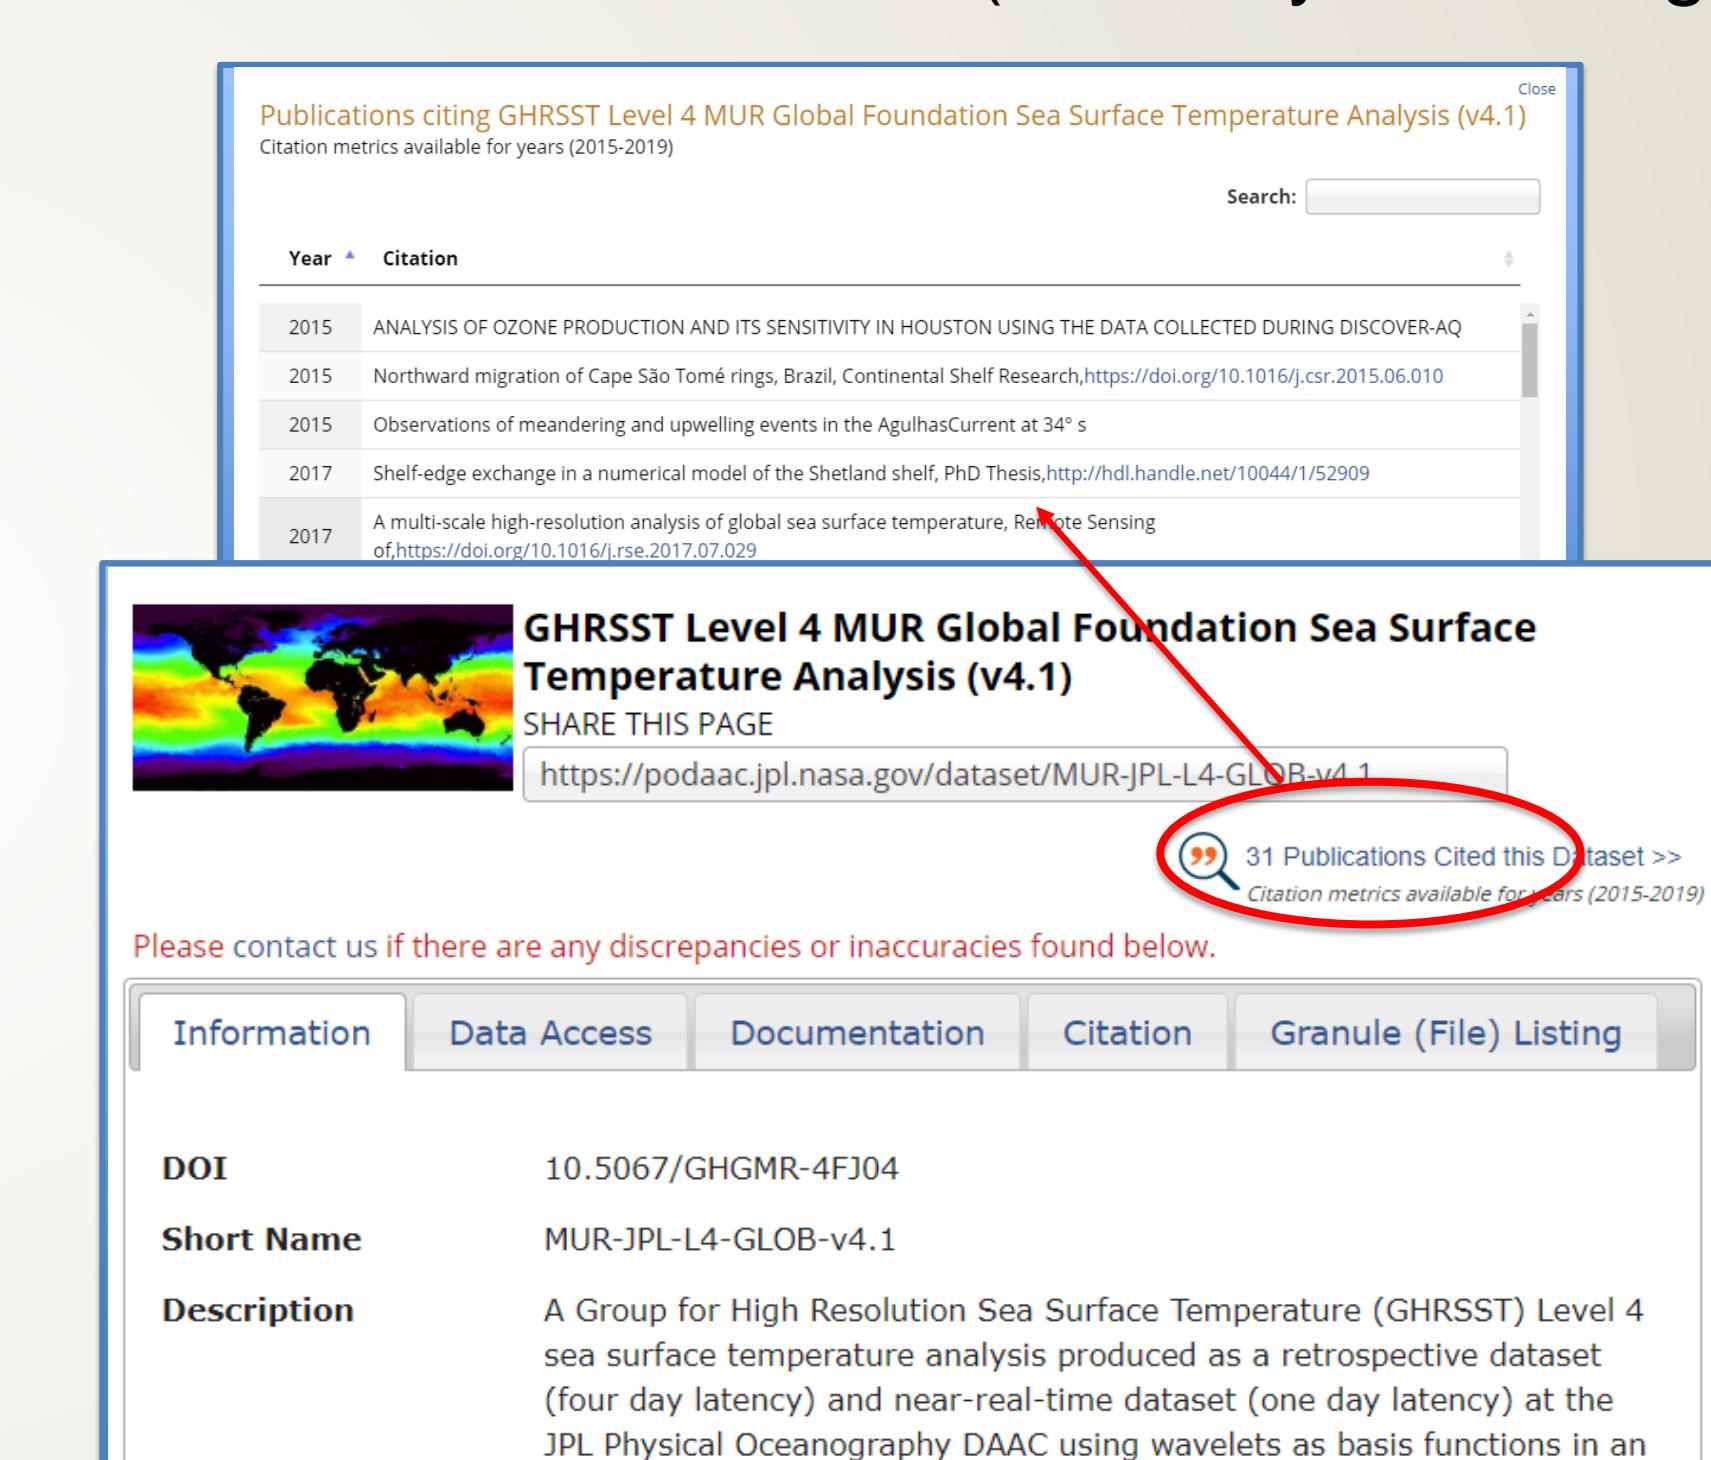

- Data Resources Page with dynamic filtering by category, type, and science discipline

** PO.DAAC search will integrate the NASA CMR data search engine soon.

Playing a big role in Data Access and Download

1. Execute wget and curl commands

```
# To download one-day GHRSSST Data Files
wget -user=LOGIN --password=PASSWORD -r -nc -np -nH -d -A "nc" "https://podaac-tools.jpl.nasa.gov/drive/files/OceanTemperature/ghrssst/data/GDS2/L2P/AMSR/REMS"

# To download one year data files and create sub-directory
wget -user=LOGIN --password=PASSWORD -r -nc -np -nH -d -A "nc" "https://podaac-tools.jpl.nasa.gov/drive/files/OceanTemperature/ghrssst/data/GDS2/L2P/AMSR/REMS"
